Red Frost, ice and/or Snow are forecast to occur.

Orange Road Surface Temperature (RSTs) are forecast to be +0.5°C or below (including DRY roads below 0.0°C) - there is still a risk of frost, ice or snow. See the detail of the forecast for more information.

Yellow RSTs are forecast to be between +0.6°C and +1.9°C - there is a lower risk of frost, ice or snow. See the detail of the forecast for more information.

Green RSTs are forecast to be +2°C or higher.

i Where residual snow/ice remains on the road surface from a previous day, the shown colour should be overridden and treated as **RED**.

Falling snow and rainfall are indications of how much may fall in the time period rather than the amount that will settle.

ROAD SURFACE TEMPERATURE
 Below 0.0°C

RAIN ACCUMULATION

Red Frost, ice and/or Snow are forecast to occur.

Orange Road Surface Temperature (RSTs) are forecast to be +0.5°C or below (including DRY roads below 0.0°C) - there is still a risk of frost, ice or snow. See the detail of the forecast for more information.

Yellow RSTs are forecast to be between +0.6°C and +1.9°C - there is a lower risk of frost, ice or snow. See the detail of the forecast for more information.

Green RSTs are forecast to be +2°C or higher.

i Where residual snow/ice remains on the road surface from a previous day, the shown colour should be overridden and treated as RED.

Falling snow and rainfall are indications of how much may fall in the time period rather than the amount that will settle.
